ABN: 61 058 454 569
LICENSES	**PEP 170**: Petroleum Tenement, Issued: 19/10/2010, Expires: 13/10/2015, Area: 804.28 Square Km. Icon Energy are planning to frack in this area for tight gas. It's estimated that there is 1 trillion cubic feet of gas accessible through these wells. PEP170 is also prospective for oil in the shallow La Trobe Group, in the Gippsland Basin. **PEP 172**: Petroleum Tenement, In the process of registration with the native title tribunal, Area: 1,312 Square Km, Icon Energy 100% **PEP 173**: In the process of registration with the native title tribunal, Area: 1,220 Square Km, Icon Energy 100% - Both PEP 172 and 173 are prospective for natural gas, and are awaiting registration with the Native Title Tribunal after completion of an Indigenous Land Use Agreement with the Gunaikurnai Land and Waters Aboriginal Corporation Registered Native Title Body Corporate.
HISTORY	Based in Qld, currently hold tenements in 12 sites in Australia. Shareholders for Icon include nominees from Merrill Lynch, JP Morgan, Link Orange, Citicorp and Bond Street Custodians. They hold assets to the value of $ 46,989,840 and made $3,720,392 profit last financial year.
FUTURE PLANS	PEP170 is located near to one of Australia's major oil and gas processing plants, Exxon Mobil's Longford plant. Crude oil and gas are transported from offshore facilities in Gippsland to the Longford Crude Stabilisation Plant where they are separated into wet gas, LPG and stabilised crude oil. The stabilised crude oil is piped to Long Island Point on Westernport Bay where it is either shipped interstate or internationally or piped to the refineries in Altona or Geelong. The LNG Sales Agreement signed with Shantou SinoEnergy in March 2011 states that Icon Energy will supply 40,000,000 tonnes of LNG to Shantou SinoEnergy over 20 years. This means they need to start extracting as much gas as possible!
