Lock the Gate Victoria Petition: No Farm, No Food

Dear Premier,
No farms, no food.
We cannot allow the risk of some of our best farmland being damaged by coal and gas operations.

We call for a permanent ban on any new coal and gas mining operations in Victoria.
Under Part 1, section 7 of the existing Mineral Resources (Sustainable Development) Act, your government has the power to create "No Go Zones" for coal and coal seam gas.
The only thing lacking is political will. This issue is not going away.
Based on the experience in Queensland, I do not believe that farming and the fossil fuel industry can co-exist in the same area.
I urge you to act to protect our precious farmland from the threat of new coal and gas operations.
