Bass Strait Oil Limited 100% and Operator. This tenement comprises conventional and unconventional gas, although primarily consisting of unconventional gas fields. Geological and geophysical studies have started since the permit was issued.</p> <p>PEP 167: Petroleum Tenement, Issued:8/4/2013, Expires 18/4/2018, Area: 408 square km. Bass Strait Oil Limited 100% and Operator. Area prospective for unconventional gas. Geological and geophysical studies have started since the permit was issued.</p>
HISTORY	<p>Bass Strait Oil Company Ltd is a petroleum explorer based in Bass Strait and Western Victoria. They operate five offshore gas and oil fields in Bass strait, and hold two unconventional gas tenements and are involved in a joint venture agreement in a third tenement, in Western Victoria. They hold assets to the value of \$5,174,044. They hold agreements with Cooper Energy for Gippsland Basin permits.</p>
FUTURE PLANS	<p>Bass Strait Oil is seeking to expand onshore gas exploration in Australia. The onshore gas exploration in the Otway Basin of Western Victoria is in early stages. The company hopes to benefit from future changes in the Eastern Australian gas market and their perceived advantageous position in Western Victoria with its proximity to existing infrastructure.</p>
